

Cambridge Physics Centre presents:

Science needs science fiction

by Prof. Mete Atature, Department of Physics, University of Cambridge

Prof Atature works on the physics and applications of how light interacts with matter within the realm of quantum mechanics. This active research field forms a bridge from the foundational notions of reality to the future technologies of our lives. Find out how the creative minds of science fiction fuel new science in physics - if we can identify the right questions.

6pm on Thursday 19th January 2017

Pippard Lecture Theatre, Cavendish Laboratory,
JJ Thomson Avenue, Cambridge

Directions at <http://www-outreach.phy.cam.ac.uk/cpc/>

No need to book, just turn up
