

**Cambridge Physics Centre presents:
Furry Logic: The Physics of
Animal Life**

**By Liz Kalauger and
Matin Durrani, Editor, Physics World magazine**

Why do dogs slurp from their drinking bowls while cats lap up water with a delicate flick of the tongue? How does a tiny turtle hatchling circle the entire northern Atlantic before returning to the very beach where it hatched? These puzzles – and many more besides – are all explained by physics.

Matin and Liz introduce the great physicists whose discoveries helped us understand the animal world, and the animal experts of today who study the animals that seem to push the laws of physics to the limit.

6pm on Tuesday 5th December 2017 Sponsored by:

**Pippard Lecture Theatre, Cavendish Laboratory,
J J Thomson Avenue, Cambridge
Directions at**

**IOP Institute of Physics
Cavendish
Laboratory**
