

Important privacy statement regarding feedback on Physics at Work events

General introduction

The University of Cambridge and its Colleges are committed to widening participation to higher education. Each year hundreds of events are offered, including the Physics at Work event which you have attended, resulting in thousands of interactions with those considering an application to university. To ensure that these events are as effective as possible we conduct detailed evaluation and tracking analysis. This does not impact on an individual's current or future application in any way but enables us to continually adapt and improve our activities. We may cease to offer events and activities of which we are unable to demonstrate the effectiveness. Therefore, we greatly appreciate you taking the time to provide information and assure you that it will be handled in accordance with our privacy notice.

What we collect and why

After a Physics at Work event, we invite our visitors to participate in an on-line feedback questionnaire. The information you provided here will be used for monitoring and research as outlined at www.undergraduate.study.cam.ac.uk/how-we-use-participant-data and is mainly about opinions on the experience and how it may have provided information on topics associated with physics and higher education.
